

Workshop on Migration Modelling and Climate Change Research

This workshop brings together an interdisciplinary group of researchers to discuss work in progress on migration modelling and the interaction between population mobility dynamics and environmental change.

When? August 23, 2022

Where? Vienna University of Economics and Business, D4 Building, Room D4.2.008

10:00 – 10:45	Gregor Zens (Bocconi University)	A probabilistic model of forced displacement flows
10:45 – 11:30	Jesus Crespo Cuaresma (WU Vienna, IIASA)	Dealing with zeros in gravity models for global migration forecasting
11:30 – 12:00	Coffee break	
12:00 – 12:45	Raya Muttarak (University of Bologna)	Climate change, desertification and internal migration: Evidence from global census data
12:45 – 14:00	Lunch break	
14:00 – 14:45	Lisa Thalheimer (Princeton University)	Large weather and conflict effects on internally displaced people in Somalia
14:45 – 15:30	Nicolas Choquette-Levy (Princeton University)	Situating migration in smallholder farmers' climate adaptation portfolios

If you are interested in participating in the workshop, please register by sending an email to jcrespo@wu.ac.at by Friday, August 19. There is limited capacity, so registration will be on a first-come-first-served basis. This workshop is organized as part of the networking and outreach activities within the [eXplore! Project](#).
